

Panama, 15th September 2021

TO WHOM IT MAY CONCERN,

Mr. Luis Sarmiento, passport number 171464685, joined our team during his summer holidays for 20 hours a week, for one (1) month, with the particular interest of better understanding the sociocultural dimensions of the HIV epidemic in Latin America.

Luis was appointed to join the Program Team and worked on supporting the community for all projects by reviewing background material, contributing with graphic design, and translating from Spanish to English many communication materials. He performed all these activities with an excellent attitude, efficiently and with a strong respect for cultural differences.

He was integrated as another staff member of the office and contributed with valuable and fresh Inputs. Aside from getting tasks finished and out of the way, he surprised the team with the high level of commitment and responsibility shown in the daily work and it was inspiring to see how interested he was in learning and understanding the mandate of our Programme. His capacities in managing technology and social media were very much appreciated.

Although he is a young teenager, he is a promissory professional, very focused, and sensitive to humanistic issues, especially those that directly affect the lives of the most vulnerable populations. We hope this information helps you to better know Luis's character and commitment to public service. Confidently recommend Luis for any educational path that he wishes to take, I am sure he will thrive and become an excellent professional one day.

Respectfully,

A handwritten signature in black ink, appearing to read "Tania", with a stylized flourish.
